Aftercare: Children who are not picked up within fifteen minutes of their pick-up time will be placed into aftercare at the parents’ expense ($10/day for each child). Any aftercare camper left after 6:15 pm will be charged a late fee of $1.00 per minute.

Tuition, Payments, and Refunds: If payment in full is not made by May 1, 2019, camper enrollment may be subject to cancellation at the discretion of the camp director. A portion of the tuition ($100 per full-day session and $75 per individual program) is a non-refundable deposit and will not be returned for any reason. A full refund less the deposit will be given up until May 1, 2019. After May 1, 2019, tuition is forfeited and may be transferable subject to availability. If unforeseen conditions, including, but not limited to, hurricanes, power outages, and epidemics, cause IMACS to shut down its summer camp for any length of time, no tuition will be refunded, credited, or transferred.

My initials to the left indicate that I have read and agree to abide by the camp refund policy.

Conduct and Discipline: The directors reserve the right, at their sole discretion, to withdraw any camper whose influence or actions are deemed unsatisfactory or detrimental to the camp or who will not abide by the camp rules and policies. If this occurs, no reduction or return of fee, or any part thereof, will be made.

Attendance and Punctuality: Campers should make every attempt to attend all classes. IMACS does not offer individualized make-up classes.

Media Release: IMACS may take photographs or video of any child participating in summer camp activities, and may use these images for marketing purposes. No compensation will be made for the use of these images.

Lunch & Snacks: Campers should bring lunch in a cold pack. Snacks and drinks are available for purchase at IMACS for $0.75 each. Campers may also bring their own snacks.

First Aid & Medications: IMACS staff are not allowed to administer first aid or to dispense over-the-counter medications to any camper without express prior written permission of parents. A first aid kit is available for any camper requiring an antiseptic or Band-Aid. All possible precautions are taken to ensure that the activities at IMACS Summer Camp are conducted in a safe and responsible manner. However, because of the nature of some of the activities, regardless of the high degree of supervision, there is a potential for accidental injury. Parents agree to assume these risks and to release IMACS, its officers, directors, employees and agents from, hold them harmless from and waive any claim against IMACS as to any injury that may occur to their child(ren) while attending IMACS Summer Camp.

I have read and agree to all of the terms outlined above. (Signature required)

Session #1: In Just One Week . . .  
In a single session of camp, your child will
solve IMACS logic puzzles
control virtual robots
play strategic games
program computers
build electronics projects

What makes IMACS Summer Camp so much fun?  
It’s more than the friendships made during the Full Day Program. It’s more than the unique activities IMACS provides. It’s the pride that campers have in doing things they did not think that they could do. Of course, no student will tell us that, but we see it in their faces. We see it around Wednesday in Logic Puzzles when campers solve puzzles that seemed impossible just days ago. We see it in the computer lab, when campers start to realize that they are doing more than just blindly using the computer; they are controlling it to do their bidding. We see it in Electronics, when campers take home working projects that they made from scratch.

Each session is one week in length. Classes are Monday through Friday.
You choose the weeks you want. They do not need to be consecutive. New campers are welcome each week.

Full Day Camp:  
• Consists of the Logic Puzzles, Electronics, and Computer classes
• Camp is from 9:15 to 4:15 (FREE early drop-off from 8:00 to 9:15)
• Lunch from 11:15 to 12:00; short breaks within and between classes.
• A Full Day camper should bring lunch in a cold pack. Snacks and drinks are available for $0.75 each.

In Just One Week . . .
In a single session of camp, your child will
• solve IMACS logic puzzles
• control virtual robots
• play strategic games
• program computers
• build electronics projects

These activities allow campers to exercise their 21st-century skills: critical thinking, problem-solving, and innovation.

Note: • For registrations before May 1, 2019, provide a non-refundable deposit of $100 per full day session and $75 per individual class per session. Balances on these registrations are due by May 1, 2019.
• Any registration on or after May 1, 2019 must be accompanied by a payment in full.

Instructors
There are no “counselors-in-training” at IMACS. There are no college students pretending to be trained instructors. IMACS is intense, rigorous, and uncompromising in its search for instructors. To be blunt, most professional educators would not pass the initial tests and evaluations required to teach many of the summer courses. And then there’s the training and the experience. Most IMACS summer instructors have taught thousands of IMACS classroom hours. That’s because, as hard as it is to become an IMACS instructor, once it happens, the unique satisfaction of teaching our classes is so high that no one wants to leave.

Additional IMACS Programs
In addition to progressing through our summer courses, there are many other ways to get the advantage of an IMACS education. For over 20 years, IMACS students have been learning to think deeply and creatively (with no rote memorization) through after-school and weekend programs, long distance online courses, and, of course, our summer program. See imacs.org/beyond for more information.

Meet Carolina.
Before Carolina chose the IMACS Hi-Tech Camp, she and her parents had no idea that she would develop a passion for engineering and computer programming that would lead to a successful career in technology, which has included positions at both Microsoft and Motorola.

“Before IMACS I had no exposure to engineering and electronics. IMACS opened many new opportunities for me, and it played a big role in my decision to double major in Computer and Electrical Engineering at UF.”—Carolina

Meet Rachel.
First, Computer Programming and Virtual Robotics. Then, IMACS University-level Computer Science. Now, MIT doing research with neuroscientists since her freshman year.

“IMACS gave me a jumpstart on my MIT education, as it taught me to exercise the same parts of my mind that I use now on a daily basis.”—Rachel

Meet Zak.
In addition to many other IMACS classes, Zak enrolled in Electronics. He started with simple circuits and later mastered complex logical gates. That helped him to earn the College of Engineering Outstanding UF 4-year Scholar award. (Now, he’s at Stanford earning his Ph.D.)

“Thanks to IMACS, I was able to strongly grasp core concepts and use them to solve any problem, even if it was different from those I had seen.”—Zak

No registration fee. No supply fee.

Multiple Class Discount (10% off the lower class price): for a camper enrolled in more than one individual class in the same week.

Sibling Discount (10% off the lower price): for a family that enrolls more than one child in the same session.

Aftercare
Full day campers attend IMACS from 9:15am to 4:15pm. From 4:15pm to 6:00pm, an “aftercare” service is available. The cost is $10 per day. Early drop-off is available from 8:00am to 9:15am (for full day campers) at no additional charge. Please see the back page (Policies and Procedures) for additional information.

Enroll online at imacs.org/summersignup
Grades 1-2 (in Fall 2019)
Primary Logic Puzzles (4:30pm-5:30pm): Games! Puzzles! Fun! (But don’t tell your kids that they are learning how to reason and are developing a love of mathematical thinking.) Each session runs Monday to Friday.

Grade 3 (in Fall 2019)
Rising 3rd graders are typically ready for our Full Day Camp. We recommend a single week for 3rd graders. Older students can handle the more challenging, self-paced material found in multiple weeks of Computers and Electronics, but, for 3rd graders, a single week will be a great fit. Of course, they can come back next summer and proceed to the more advanced material that awaits.

Grades 4-6 (in Fall 2019)
We recommend one or two weeks of our Full Day camp. For returning students, more weeks may be reasonable. Please discuss your plan with IMACS.

Grades 7-8 (in Fall 2019)
We recommend one or two weeks of our Full Day camp. For highly gifted students entering 7th or 8th grade, a more rigorous program – including University-level Computer Science – may be appropriate. See page 4 and then contact IMACS for more details.

Grade 9 (in Fall 2019)
For a rising ninth grader, the precise nature of the Computer and Logic courses depends deeply on the particular child. We strongly recommend that you call IMACS to discuss your child’s individual abilities and perhaps to schedule an Aptitude Test.

Grades 10-12 (in Fall 2019)
A talented high school student may be ready for our highly rigorous courses in Computer Science or Mathematical Logic (available as individual classes or as part of a full day program). An Aptitude Test is required. Call IMACS at 954-791-2333 or 561-470-1178 for more information.

Which class do IMACS campers like best?

We wondered that ourselves. The classes are so varied. Logic Puzzles has team games, group interactions and friendly competitions. Electronics is “hands-on” as students build projects that they keep. And the computer class contains self-paced, virtual challenges. One Friday, we took an informal camper survey about which class was best. Our instructors were anxious to see the results, but no one could claim victory; it was a statistical tie.
